The Community Outreach Coordinator VISTA will be focused on building capacity within the Grow: Johnson County (GJC) program. In order to advance GJC’s effort to center racial equity and food sovereignty across all facets of the program’s efforts, you will conduct research into best practices on these topics, and then implement those practices in the form of racial equity policies, a Consumer Advisory Board, and farm-based educational programming for BIPOC youth. This position will focus on three key objectives: (1) Develop and present a set of recommended policies and indicators that incorporate Grow’s racial equity goals; (2) Launch GJC’s Consumer Advisory Board that directly involves those receiving food from the farm in crop planning and program decision making; (3) Support the GJC Education Coordinator in creating educational and community programming to ensure racial equity goals are accomplished.
